

Daniel Clauw M.D is a Professor of Anesthesiology, Medicine and Psychiatry. He attended undergrad and medical school at Michigan, and then did his internal medicine residency and rheumatology fellowships at Georgetown University, where he eventually held roles including Chief of Rheumatology and Vice Chair of Medicine. He moved back to Michigan in 2002, bringing with him one of the leading pain research groups. This group has helped identify the prominent central nervous system contributions to a number of chronic pain disorders, as well as the most effective pharmacological and non-pharmacological treatments for chronic pain. Dr. Clauw was also the first PI of the UM CTSA award and Associate Dean for Clinical and Translational Research, and founding director of MICHHR. Although he stepped down from these latter roles in 2009 to re-dedicate himself to pain research, he remains very active in institutional clinical research training programs and is a very active and recognized mentor of clinical and translational researchers.
